

## Q S L

The Editor received a letter as follows from Mr. Edward C. Andrews of Philadelphia, Pa.:

I am enclosing a postal which I have received from Mr. W. T. Fraser of Buffalo, N. Y. (8VX) on which he states my signals were heard in Buffalo clear and strong. This is a distance of over 400 miles and I naturally felt somewhat elated as it was accomplished with 1-4 Kw. Chambers open core transformer.

But aside from the fact that this is a fairly good record, I wish to commend the spirit of unselfishness that is quite evident in Mr. Fraser and others who send cards which tell of receiving the signals of a fellow amateur. While these cards of 8VX (Mr. Fraser) may have come to your attention before, I have never seen a notice about it in our magazine. When one goes to the trouble and expense of having a postal printed in order to inform those who signals he hears, it seems to me that a long stride has been taken, toward aiding the perfection and inspiration to amateur work.

Until I received word from 8VX, I thought my maximum sending range was seventy-five miles. At Mauch Chunk and the Delaware Gap my signals are slightly stronger than NAI and quite similar to WHE.

I would urge upon the members of the A. R. R. L. and the readers of QST to notify by postal and by the very next mail the owner of the station whose signals they hear and to give such other information as they may think of aid or inspiration to the recipient.

Respectfully,

(Sgd) Edward C. Andrews, 3TQ.
