QSL A25XX ---> Lorenzo, IK1MDF says that the A25XX cards arrived from the printer on 21 January. Owing to the recent major postal rates increase [425DXN 1027], 2 USD do not cover return postage any longer to the vast majority of international destinations. At all events, he says, all of the QSOs will be confirmed through the bureau and will be uploaded to LoTW as soon as possible.

QSL HH2/PA5M ---> The QSL cards have arrived from the printer, after the first batch got lost in the mail. Direct requests with sufficient return postage will be processed "soon", PA5N says, while "all buro cards will be answered soon after".

QSL ZL8X ---> Hopefully the QSL cards will be ready by early March: "as we will have a special QSL card, the design also takes a little bit more time than usual", DL1MGB says. "Please be patient, it is worth waiting!". QSLling policy, including LoTW, is detailed at [www.kermadec.de](http://www.kermadec.de)

SPFF ---> The website for the Polish Flora and Fauna Award (SPFF) can be found at <http://spff.eham.pl/> [TNX SP2FAP]

+ SILENT KEYS + Recently reported Silent Keys include W.P. "Paddy" Gunasekera (4S7PB, past president of the Radio Society of Sri Lanka), Drago Grabner (E73F, ex YU4VGD and T94GB), Willy Fiallo (HI8MWF), Alberto Di Pietra (IW9FC) and William B. "Bill" Wilson (WA8YTM).

If you have not received your QSL by March 1, please inquire at [info@\[jstmaarten2010.com\]](mailto:info@[jstmaarten2010.com]) and do not re-send cards at this time". [TNX W8GEX]

Direct QSLs go via ZP6CU.

SOUTHERN SUDAN 2011 ---> On 9-15 January Southern Sudan held a referendum to decide whether to continue to be part of the Republic of Sudan or chose independence as a separate nation. The poll was agreed as part of a 2005 peace agreement to end two decades of war, and the results show an overwhelming vote for secession. The new country is set to formally declare its independence on 9 July. When Southern Sudan meets the current DXCC criteria, it will be a new Entity and two announcements of DXpeditions have already been made.

\* First Bernie, W3UR reported that "a working group has been established to enable Amateur Radio to enter the scene with a professional, supportive role in the context of introducing the new country to the world of Amateur Radio. It should be noted that this potential new country is emerging with a limited administrative structure, and the first Amateur Radio activation should - prior to the operation - be accompanied with a well-thought-out plan prepared in partnership with Southern Sudan's relevant authorities, such as telecommunications, security and education.

The group of Alex 5Z4DZ (PA3DZN), Robert S53R and Martti OH2BH has organized such an effort in discussions with Southern Sudan's institutions and other related parties in the region. The group will also be holding discussions about the provision of potential help to Southern Sudan's prospective Amateur Radio Service with several entities, such as NCDXF, in addition to obtaining resources from Japan.

Updates will be released from time to time between now and July, and it is predicted that prospects for a new DXCC counter are some months away with preparations well underway".

\* Then Paul, N6PSE announced that the Intrepid-DX Group and the DX Friends are planning a joint operation "to take place on or after July 9th 2011".

This is intended to be "a major effort, with a target of more than 150,000 QSOs. There will be up to ten stations on the air, using amplifiers along with high performance beams and vertical dipole arrays, 24 hours a day, for almost three weeks". While continuing "to move forward in our planning with representatives of the new Southern Sudan Government and the ITU/IARU", they "are not seeking donations or support until we have an official operating permit/license in hand". The website for the DXpedition is at [www.dxfriends.com/SouthernSudan2011/](http://www.dxfriends.com/SouthernSudan2011/)

425 DX NEWS MAGAZINE ---> The latest issue (February 2011) is now available for download at [www.425dxn.org/monthly/index.html](http://www.425dxn.org/monthly/index.html). [TNX IZ3EBA]

JAPAN EMERGENCY TRAFFIC ---> Due to the Japanese earthquake and tsunami disaster, it is recommended/suggested to please stay clear of the following emergency frequencies: 3520-3530, 7025-7035, 14090-14110, 21190- 21210, 28190-28210, 50100 and 51000 kHz, as well as 144.100, 145.000, 145.500, 430.100, 433.000 and 433.500 MHz. It is also suggested to stay away from the IARU Region 3 Emergency Centre of Activity frequencies (3600, 7110, 14300, 18160 and 21360 kHz).

MONK APOLLO PROJECT ---> Rick, NE8Z has been issued a "pilgrim visa" to enter Mt. Athos and will be visiting Monk Apollo (SV2ASP/A) on 9-16 April.

"I will be taking him radio equipment accessories to compliment his present ham radio station", Rick says, "Monk Apollo has shown the desire to operate from portable locations in Mt. Athos so that he can work Asia which is partially blocked by a mountain behind his Monastery". The Southeast Michigan DX Association has adopted the project of helping Monk Apollo to improve his permanent and portable stations. Details on the project and a PayPal link for donations can be found at <http://live.semdxa.org/> (click the "Monk Apollo Project" button). [TNX NE8Z]

PIRATE ---> Do not waste your time on working HS0ZDZ. "The last entry in his log that I have is 31 July 2004", his QSL manager (GM4FDM) says. Three months later the genuine Ray Gerrard, HS0ZDZ (G3NOM) suffered a serious stroke and is no longer active. GM4FDM is "slowly putting Ray's logs onto LoTW. HS0ZDZ and HS0/G3NOM are already there".

the 1981 operation, but nothing since. [TNX N7NG]

- 4W - 4W6A is the callsign to be used from Atauro Island (OC-232), Timor-Leste on 16-26 September [425DXN 1032]. Steve 9M6DXX, John 9M6XRO, Tim M0URX, Ant MW0JZE, Oliver VK8DX and Stuart VK8NSB will operate SSB, CW and RTTY on 10-160 metres with four stations. This is not specifically an IOTA DXpedition, rather it is a DXCC DXpedition that happens to be from a rare IOTA group and the team will try "to give amateurs around the world a new DXCC band-mode counter on as many bands as possible". QSL via M0URX, direct or bureau. The entire log will be uploaded to LoTW "at the earliest opportunity". The group is requesting donations from DX clubs and individuals who wish to help, in order to cover the high cost of generator hire, fuel for the generators and the boat charter to and from the island. Further information, including QSLling instructions, can be found at [www.4w6a.com](http://www.4w6a.com) [TNX 9M6DXX]

INTERNATIONAL MARCONI DAY ---> Organized by the Cornish Radio Amateur Club, the International Marconi Day (IMD) is a 24-hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi (25 April 1874). It is not a contest, but an opportunity for amateurs around the world to make contacts with historic Marconi sites using HF communications techniques.

This year's event will be held on 30 April, from 00.00 UTC through 23.59 UTC. Details, including information on the relevant Award Certificates and the listing of participating stations, can be found at [www.gb4imd.org.uk](http://www.gb4imd.org.uk)

IOTA 50TH ANNIVERSARY MARATHON ---> The year 2014 marks the 50th anniversary of the launch of the Islands On The Air (IOTA) Programme by British SWL Geoff Watts, BRS-3129. To celebrate the occasion, the RSGB IOTA Manager and Committee announce an exciting activity period in which all licensed amateurs world-wide are invited to participate.

For a two-year period (from 00.00 UTC 1 January 2012 until 23.59 UTC 31 December 2013), IOTA chasers are encouraged to contact as many different IOTA groups as possible, and IOTA activators to play their part

by operating from as many groups as possible, with special emphasis on the less-frequently activated ones. Certificates and awards will be available to both 'Chasers' and 'Activators' to reflect attainment of graduated bands of performance together with attractive prizes for top scorers. The challenge provides a level playing field for everyone, because everyone starts with a clean slate on 1 January 2012.

The full rules of the IOTA 50th Anniversary Marathon can be found on G3KMA's website ([www.g3kma.dsl.pipex.com](http://www.g3kma.dsl.pipex.com)) and soon on the RSGB IOTA website ([www.rsgbiota.org](http://www.rsgbiota.org)).

4W6A ---> 4W6A will be QRV on all bands and modes from Atauro Island (OC-232), Timor-Leste on 16-26 September [425DXN 1039], and everything is on schedule for the expedition. Team members' air tickets have been booked and paid for, a boat has been chartered, the accommodation on Atauro and the generators have been booked, arrangements have been put in place for sufficient fuel to be transported to the island. Hopefully the team will be able to use an Internet connection on the island, and, if this proves to be reliable, logs will be uploaded to Club Log ([www.clublog.org](http://www.clublog.org)) and LoTW on a daily basis. The latest press release (11 May) can be found at [www.4w6a.com](http://www.4w6a.com), along with further information on the DXpedition and details on how contribute to the project.

MIDWAY ISLAND ---> "I have just been assigned to work on Midway Island as the Chief Communications Officer", Joe W5FJG says. "I hope to be on the air as KH4/W5FJG either the last week of May or the first week in June. I will be stationed here for at least one year.

At this time I have an Icom Ic-7000, but no antenna. I am working within the guidelines of the Island administrators on getting an antenna in the air to start off with. I intend to work from 6 through 40 (80 if a suitable antenna can be obtained). SSB, CW, RTTY and other digital modes will be worked.

I am seeking donations of (or funds for the purchase of) a Multi-Band Vertical and or smaller 3el yagi. Also looking for donations for other station equipment.

Since I will be here for one year or more, I am looking to build a permanent Amateur radio shack that will keep Midway on the air long after I have departed.

Will provide more info such as QSL route and operating times later". Joe can be contacted at joeyjeepusa[ @ ]yahoo.com

CQ 2010 HALL OF FAMERS ---> CQ Magazine announced on 20 May its 2010 Hall of Fame inductees. The CQ Amateur Radio Hall of Fame was established in January 2001 to recognize individuals - radio amateurs or not - who significantly affected the course of Amateur Radio, as well as radio amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. This year's inductees are: Nate Brightman (K6OSC), Robert Schmieder (KK6EK), E. King Stodola (W2AXO, SK), Bob Gunderson (W2JIO, SK), Dave Bell (W6AQ), Cardinal Roger Mahony, Archbishop Emeritus of Los Angeles (W6QYI), Ron Moorefield (W8ILC), Loretta Ensor (W9UA, SK), Malcolm Raff (WA2UNP, SK), Allen Taflove (WA9JLV), Sylvia Margolis (SK) and Ted McElroy (SK).

The CQ Contest Hall of Fame (established in 1986) and the CQ DX Hall of Fame (established in 1967) honour those amateurs who not only excel in personal performance in these major areas of amateur radio, but who also "give back" to the hobby in outstanding ways. This year's inductee to the CQ Contest HoF is John Sluymmer (VE3EJ). The 2011 inductee to the CQ DX HoF is Michael J. McGirr (K9AJ).

DXCC NEWS ---> VU4PB (Andaman & Nicobar Islands, 2011 operation) has been approved for DXCC credit. [TNX NC1L]

EU PSK DX CONTEST ---> The EU PSK Club amateur radio operators all over the world to participate in the 8th European PSK DX Contest, to be held on 21-22 May (from 12 UTC to 12 UTC). The objective of the contest is to establish as many contacts as possible

between radio amateurs around the world and radio amateurs in Europe using the BPSK31 mode. Rules can be found at [www.eupsk.com](http://www.eupsk.com)

IOTA: RULE CHANGES ---> With the publication this month of the new IOTA Directory a number of rule changes have come into force including the raising of the minimum QSO threshold from 200 to 1000 QSOs for first-time activated new IOTA groups and amendment of the handling of islands previously deleted following a deletion of a DXCC entity, allowing acceptance of old Penguin Islands and Red Sea Islands QSOs for AF-070 and

AS-009 respectively. A note of the main changes has been uploaded to G3KMA's website ([www.g3kma.dsl.pipex.com](http://www.g3kma.dsl.pipex.com)).

QSL P40L ---> "Now that P40L is active again, I am getting QSL requests and emails for/about both old and fairly new QSOs", Erik K5WW says. Please note that he has not been the QSL manager for P40L for a couple of years; the current QSL route is via WA3FRP.

WRTC-2014 ---> Tim Duffy (K3LR), Craig Thompson (K9CT) and George DeMontrond III (NR5M) are the initial members of the WRTC-2014 Advisory Council. The Advisory Council consists of individuals who have experience in the execution of major events and are willing to provide significant financial resources to the project. The 2014 World Radiosport Team Championship will be held in New England ([www.wrtc2014.org](http://www.wrtc2014.org)).

+ SILENT KEY + George Ripley (GD3AHV) passed away on 11 May at 90 years + of age. He was one of the very first 6m permit holders in the UK who started operating on 50 MHz back in February 1982.

Donations from STARS and others helped to enable the revival of ET3AA. Led by Sid ET3SID the club installed their their shack and built antennas on top of the roof of the Technical Faculty of the University of Addis Ababa". The full story is available on the IARU Region 1 website ([www.iaru-r1.org](http://www.iaru-r1.org)).

SOUTH SUDAN DXCC STATUS ---> By Martti Laine, OH2BH: "With great anticipation, DXers the world over are looking forward to the 9th of July this year as the predicted day of South Sudan's declaration of independence. Indeed, that declaration is set to happen, but it will not yet guarantee the birth of a new DXCC entity, at least at that time. The DXCC rules are written in such a way that only a new country's membership in the United Nations and/or its ITU country prefix will result in the anticipated DXCC counter. The U.S. State Department Geographer's list of Dependencies and Areas of Special Sovereignty obviously does not apply in this case.

The opinion from the ARRL is that no exceptions will be made in this case.

They state that the event date - i.e. declaration of independence - will not cause potential QSOs to be counted retroactively. Rather, Newington categorically assumes that U.N. membership, which will most likely come first, followed by the release of an ITU prefix by the U.N. telecommunications agency, will lead to country status.

The prospect of a new country has taken an unexpected turn just recently.

The country's borderline has never been settled between North and South Sudan in the area (Abyei) where most of the oil reserves are located. It was agreed under the 2005 Peace Agreement that the border issue will be resolved by the people in that province. A referendum to settle the matter has not happened. Instead, the North (ST2) has entered the disputed province with force. Additionally, the North has stated that they will not support an independent State in the south unless the contested region is theirs. The matter now remains totally in limbo (<http://www.bbc.co.uk/news/world-13560829>).

While the amateur radio project announced earlier this year by 5Z4DZ, ST2AR, W3UR and OH2BH is well underway, it is not yet reasonable to swing your antennas toward South Sudan, as we speak. The project has two

well-known DXers now permanently based in South Sudan: SM7PKK and YI1DZ/ST2DZ. The knowledge and the professional presence are in place to proceed with an immediate activation as soon as the above country status matters are resolved. More news to follow". [TNX OH2BN]

WORLD CASTLES WEEKEND ---> Organized by the World Castles Activity Group, it will be held on 25-26 June. Several stations are expected to operate from fortresses and castles in Belarus, Belgium, Croatia, Czech Republic,

France, Germany, Hungary, Ireland, Italy, Poland, Portugal, Romania,

Russia, Slovakia, Spain, Switzerland, The Netherlands, Ukraine and the United Kingdom. Information on the event can be found at [www.wcagroup.org](http://www.wcagroup.org) [TNX RN1CW]

DXCC NEWS ---> TJ9PF (Cameroon, 2011 operation) has been approved for DXCC credit. Special note: "We have been notified that the TJ9PF QSL labels have been printed with the year 2001 instead of 2011. This is a known software bug that has been fixed. Regardless, we do not believe the integrity of the TJ9PF logs or operation are affected by this printing error. Also, the TJ9PF logs have now been uploaded to LoTW, providing a primary source of QSO confirmations. We will add instructions to the DXCC system internally to note this operation's correct year. No one wants to promote the wasting of resources to reprint labels or cards, or to require resending of cards to fix an error which has little effect on the program. DXCC will accept TJ9PF QSLs showing the date as 2001". [TNX NC1L]

DXCC NEWS ---> VK0KEV (Macquarie Island, 2011 operation) has been approved for DXCC credit. "If you've had this operation rejected in a recent application please send a note to [dxcc@\[arrl.org\]](mailto:dxcc@[arrl.org]). You can verify the update to your record either by checking your LoTW account, or, you'll see a change in the live daily listing on the DXCC web site". [TNX NC1L]

J48O ---> The website for the 17-25 June operation from Othonoi Island (EU-052) [425DXN 1047] can be found at [www.j48o.com](http://www.j48o.com)

MARKET REEF ---> "A group of Finnish DXers have agreed with the Finnish Lighthouse Society (FLS), the folks currently operating and renovating the Market Reef lighthouse, that a permanent SteppIR beam can remain on the roof of the building and can be used by visiting DX groups at the cost of modest compensation to the FLS. New services also include a large generator/battery plant able to supply 3x 230 VAC 10A each (6KW) on a 24/7 basis for visiting groups. In spite of inclement weather with icy storms, the SteppIR beam survived another winter season (2010/2011), and you can see its location by looking up the daily diary of the lighthouse for April 25, 2011 at

www.majakkaseura.fi

FLS encourage radio visits to Market Reef from Aland Islands. If you plan to make a trip of your life as a small group and get into instant pileups, please contact the Finnish Lighthouse Society (info@[m]ajakkaseura.fi) for more details". [TNX OH2BN]

QSL ZL8X ---> The last 1,000 envelopes have been mailed, and all of the direct requests (through OQRS or by mail) have been processed. So "if you don't have your QSL card in your mail in 10 to 15 days", DL1MGB reported on

7 June, "please contact us via our contact form on our website (www.kermadec.de). We already started with processing all bureau requests which were received through our Online QSL Request System. They will be sent via bureau around end of June". A photo book containing 140 pictures "from the beginning of the adventure till the last sunset" can be purchased on the website.

SOUTH SUDAN ---> The Intrepid-DX Group and the DX Friends/Tifariti Gang (www.dxfriends.com/SouthernSudan2011) continue to move forward with their plans to activate Southern Sudan. "We have held several successful meetings with representatives of the Government of Southern Sudan", they say in their Press Release #3 dated 6 June. "We have been issued an amateur radio license for the purpose of this DXpedition. The Government of South Sudan is very supportive of our plans to visit Juba and to help them celebrate the birth of their new country.

The Government of South Sudan will declare their independence from Sudan on July 9th, 2011. They have applied to the UN for admission as a member state. The UN General Assembly and Security Council will vote on the matter in the weeks following the declaration of independence.

While there have been attacks and fighting in the disputed border region of Abyei, these issues are not expected to derail the emergence of this new country.

We plan to be in the new capital of Juba and to be ready to start our DXpedition upon admission by the UN. We will have 18 operators operating 24X7 on seven active stations.

At this time, we are seeking Foundation, Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition". [TNX N6PSE]

Vice President of South Sudan, Dr. Riek Machar Teny has announced that admission as a member state of the United Nations will take place on July 14th, 2011.

The DX Friends and the Intrepid-DX Group continue to monitor the UN General Assembly and Security Council votes and are moving forward with our plans for a large multi-national DXpedition to take place soon after the UN admission occurs.

Equipment has been procured and is being staged for rapid delivery to Juba, the new capital of Southern Sudan. Team members have applied for their visas and we are awaiting them now.

We have held several successful meetings with representatives of the Government of Southern Sudan. We have been issued an amateur radio license for the purpose of this DXpedition. The Government of South Sudan is very supportive of our plans to visit Juba and to help them celebrate the birth of their new country.

We plan to soon be in the new capital of Juba and to be ready to start our DXpedition after admission by the UN. We will have 18 operators operating

24/7 on seven active stations.

At this time, we are seeking Foundation, Club and Individual Sponsors to help us defray the costs of carrying out this very important DXpedition.

>>> NEW DXCC ENTITY: THE REPUBLIC OF SOUTH SUDAN <<<

On 14 July the UN General Assembly admitted the Republic of South Sudan as the 193rd member of the United Nations.

Consequently, South Sudan has been added to the DXCC List as a new Entity (the 341st on the "current" list, thus moving the Honor Roll threshold to 332), by way of Section II, 1(a) of the DXCC Rules. The DXCC entity code assigned to Republic of South Sudan is 521. This is a totally new Entity for all DXers (i.e. the deleted Entity of Southern Sudan, ST0 has NOT been reinstated, as per DXCC Rules), and the DXCC Desk will begin immediately accepting QSOs for it, with a start date of July 14, 2011.

"The deadline for the Honor Roll and annual listings is December 31, so you must submit the new entity to DXCC by then in order to retain your Honor Roll status," Bill Moore, NC1L explained. "For Logbook of The World (LoTW), you may submit all your QSOs with the Republic of South Sudan stations anytime. There is no need to hold them out of your log or do anything differently from what you already have been doing. You do not need to assign country names or identifiers. After we issue certificates to the Republic of South Sudan license holders, LoTW will make matches and assign the correct entities automatically."

The Republic of South Sudan is also the newest addition to the CQ DX Award Countries List (it is #342, as CQ counts Kosova). Verifications confirming contacts after July 14, 2011 are acceptable for credit. No award credit is available for southern Sudan contacts made during the 1980s and 90s. The new addition will be reflected in CQ DX Honor Roll totals to be compiled near the end of September. South Sudan will count as a country (entity) multiplier for the CQ DX Marathon, the CQ World Wide DX Contest and any other CQ contests that use country multipliers.

As of 14 July, the International Telecommunication Union (ITU) has not announced a prefix block for the Republic of South Sudan.

DXCC DIGITAL AWARD ---> In accordance with Minute 29 of the July 2011 ARRL Board of Directors meeting, the DXCC award for RTTY is now changed to Digital. Digital will now replace RTTY on these certificates effective 25 July 2011. [TNX NC1L]

HF-DX CONVENTION ---> The VI International HF-DX & Contest Convention organized by ARI Catania ([www.arict.it](http://www.arict.it)) will be held at the President Park Hotel (Acicastello) on 10-11 September. Main speakers will include I2VGW,

I8NHJ, IT9EJW, IT9IZY, IW9GTN, YT1AD and I1JQJ. Please contact Santo Coppola, IT9ICS (santocoppola[[@](mailto:santocoppola@tin.it)]tin.it) for further information. [TNX IT9ICS]

ILLW ---> The 14th annual International Lighthouse/Lightship Weekend, Conducted under the sponsorship of the Ayr Amateur Radio Group, will take place from 00.01 UTC on 20 August until 23.59 UTC on the 21st. Complete information on this popular event, including a list of participating stations (412 so far), can be found at <http://illw.net/>

JARVIS ISLAND 2012 ---> The DXpedition to Jarvis Island organized by Radio Expeditions Inc [425DXN 1009] has been postponed once again, this time to November-December 2012, "due to a scheduling conflict with the Braveheart".

ROCKALL 2012 ---> A team of four highly experienced IOTA activators (George EA2TA, Christian EA3NT, Simon IZ7ATN and Col MM0NDX, all part of the larger MS0INT IOTA adventure group) have plans to operate from the extremely rare and dangerous Isle of Rockall (EU-189).

Accompanied by Nick Hancock, a climber with considerable experience in inhospitable places, they aim to land and stay atop Rockall for maximum 48 hours. "With research and historical data, we believe the end of May/beginning June 2012 is a viable time period to put Rockall on the air", they say. As Rockall is an isolated speck of rock surrounded by water, weather and seas will dictate the entire expedition. Near perfect landing conditions are required, and the skipper of their yacht will have the final say.

The team is seeking donations to help offset some of the expense. To donate, you can use paypal (rockall.eu189[[@](mailto:rockall.eu189@gmail.com)]gmail.com). A website is under construction. [TNX MM0NDX]

ST0R ---> ST0R (South Sudan) has been approved for DXCC credit. The DXpedition went QRT at 7 UTC on 10 August, after 121,286 QSOs (55458 CW, 47696 SSB and 18132 RTTY) with 27,994 unique callsigns.

"We are very excited about how well the ST0R DXpedition went", Paul N6PSE says. "The DX Friends and the Intrepid-DX Groups worked well together and really enjoyed our three weeks together. We are already talking about our next DXpedition/Adventure!

We are quiet happy that we met our goal of 120,000 QSOs and set a record for RTTY contacts during a new country activation.

We wish to thank all of our donors and supporters. Ordinarily we thank our donors with an individual message, however the Internet in Juba was very unreliable and we were often without any connection to the outside world other than Amateur Radio.

This week, we held another meeting with the Engineering staff of the Ministry of Communications to guide them in their ITU prefix application. We are also providing them with guidance to develop and improve their Amateur Radio program and policies". Tony, EA5RM (Team Co-Leader and QSL manager) will investigate your 'busted call' requests, if you email him directly.

+ SILENT KEYS + Microwave pioneer Ludovico "Vico" Zauli (I4ZAU, ex + I6ZAU)

passed away on 2 August. Other recently reported Silent Keys include Mario Borri (IK1CHM) and Nikolai N. Malikov (U3CN).

3D2XX (1988) ON LOTW ---> The computer disks have been lost, but W6SZN has the paper log. You can email your QSO data to Kip (kedwards[@]itol.com) and he will upload the requests to LoTW once a week or so. This was the first DXpedition to Rotuma. [TNX The Daily DX]

With the arrival of the Titanex, the 18m Spiderbeam pole will now be used for a full-size 80m quarter-wave folded monopole vertical instead. All the antennas will be located on the beach within a few metres of the ocean.

4W6A will be QRV from Atauro Island (OC-232), Timor-Leste on 16-26 September. There will be up to four station active on 160-10 metres CW, SSB and RTTY.

QSL via M0URX, direct or bureau (OQRS at [www.m0urx.com](http://www.m0urx.com)). The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Further information can be found at [www.4w6a.com](http://www.4w6a.com) [TNX 9M6DXX]

QSL VIA W8AEF ---> "Due to poor health, Dan Brown (NA7DB) has passed logs for all of the following over to W8AEF", The Daily DX reports:

9M0M	1-9 Mar 2001	XZ1ZV	30 Jan- 2 Feb 2000
NA7DB/HP4	4-13 Jan 2003	XZ5DB	31 Mar - 3 Apr 2002
XZ1L	30 Jan - 2 Feb 2000	ZK1AAG	6-17 Mar 1994
XZ1VS	31 Jan - 2 Feb, 2000	ZK1WTU	6-10 Mar 1994
XZ1YL	30 Jan- 2 Feb 2000	ZK1ZRD	6-17 Mar 1994

There are no cards left for some of those activities, so he will issue "just a note confirming the contact rather than a printed QSL. Logs will be loaded to LoTW when time permits".

XF4L (1989) ON LOTW ---> Some of the computerized logs have been lost, and only one third of the QSOs has been uploaded to LoTW. However "the paper logs remain intact and individual QSOs can be uploaded by contacting OH2BU". [TNX The Daily DX]

3D2\_r - Preparations for the large multi-national 3D2R DXpedition to Rotuma [425DXN 1049] are going according to plan. The team will meet in Suva (Fiji) on 22 September and depart for Rotuma on the 25th. They expect to be QRV on 27 September and to complete the DXpedition on 7 October. 3D2R will be active on 160-10 metres CW, SSB, RTTY, PSK and SSTV, plus 6 and 2m EME, with a focus on Europe and Africa when propagation permits. QSL via YT1AD and LoTW (logs to be uploaded some six months after the expedition). Further information - including log search (to be updated on a daily basis), suggested frequencies and details on how contribute to this expensive project - can be found at [www.yt1ad.info/3d2r/index.html](http://www.yt1ad.info/3d2r/index.html)

4W - The bulk of the equipment, including the linear amplifiers, the Titanex V160E vertical, Hexbeam and other antennas, left Darwin, Australia, on 6 September. It has all arrived safely in Dili, Timor-Leste, and is now awaiting the arrival of the 4W6A team next week.

Due to a late change of airline timetable, 9M6DXX and 9M6XRO will not now arrive in Dili before the afternoon of 16 September. The chartered boat taking the team and the equipment to Atauro Island has therefore been rescheduled to later that afternoon. It is likely that only one or two stations will be on the air that day, as the team will run out of daylight before all the antennas can be erected. The remainder of the antenna work will commence at first light the following morning (approximately 21.15 UTC on 16 September) and 4W6A should be fully operational by the morning

(UTC) of 17 September.

4W6A will be QRV on all bands 10 to 160 metres, using CW, SSB and RTTY with up to four stations simultaneously. Col, MM0NDX, is the pilot for 4W6A and is responsible for providing feedback to the team. He may be contacted at [dxer59@gmail.com](mailto:dxer59@gmail.com). QSL via M0URX, direct or bureau (<http://m0urx.com/oqrs>). The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Log search and further information can be found at [www.4w6a.com](http://www.4w6a.com) [TNX 9M6DXX]

DX MAGAZINE MOST WANTED SURVEY ---> The DX Magazine's annual Most Wanted Survey is being conducted now through 15 October. The survey form is available at [www.dxpub.com/dx\\_survey2011.html](http://www.dxpub.com/dx_survey2011.html) (please note that it is not a complete list of all DXCC Entities: if you need something that is not listed, simply use the "Additions or Comments" space at the end of the form). The STOR confirmations are not expected to be available before the deadline for the new Entity to be included in this survey, so South Sudan is not on the form this time.

The overall results will be published in the January-February 2012 issue of The DX Magazine, and the world-wide results will be posted to the web site around 15 January 2012 as well. The breakdown by mode/Low Bands will be published in the March-April 2012 issue of the magazine.

IARU REGION 1 HF BAND PLAN ---> The 22nd General Conference of IARU Region 1, held at Sun City (South Africa) on 13-19 August, made some changes to the Region 1 HF Band Plan. On 40 metres the CW contest preferred segment was withdrawn, and four new 10m FM Repeater channels were introduced which required a shift of the 10m FM Simplex channels. The revised Band Plan can be found at [www.iaru-r1.org](http://www.iaru-r1.org)

T2 - The C21A DXpedition to Nauru [425DXN 1049] has been postponed until next year, as the airline "could not guarantee the flight due to internal problems". A new destination has been arranged and now "most of the same team" (namely K4ZLE, NL8F, VK4AN, VK4FW, VK4NEF and W5SL) will be active as T2T from Tuvalu (OC-015) from 11 November to 8 December. They will operate SSB, CW, RTTY and PSK31 on 160-6 metres with 3-4 stations. QSL via VK4FW. The log will be uploaded to LoTW and eQSL within 12 months. Further information can be found at <http://t2t.pacific-dxers.com/>

T32 - The T32C expedition to Christmas Island "has hit some logistical problems", G3XTT reported on 16 September. The container "with its 6 tonnes of kit got as far as T30 (Tarawa), but onward shipping to T32 has proved impossible, despite our best efforts and promises from those involved in 3D2, T30 and T32. The ship that was due to bring our container from Tarawa has broken down and is being towed to Fiji for repairs".

The team will go ahead anyway. They will have "ten FT-450D radios, which we will hand carry to T32, along with several lightweight linears. We will also take enough hardware to set up verticals and vertical arrays for all bands 160 through 10. It may even be possible to run multiple stations on some bands, though not to the extent that we had previously planned. All our computer equipment was to be hand-carried in any case, so daily log updates to ClubLog will be unaffected. Unfortunately, unless our container makes an unlikely late arrival on the island, 6m EME will have to be abandoned, and we will not have the 4-square arrays for 30 and 40. But we will do our best to set up phased systems or other antenna configurations to achieve gain, especially towards Europe where we will continue to focus our efforts".

The expedition dates (28 September-26 October) are unaffected, "but we cannot realistically expect to have stations running on nine bands by the first weekend, though we will aim to be on some bands, at least. As we will not have everything pre-kitted, there will be a lot of building and configuration work to do once we arrive at Christmas".

Check the expedition's website ([www.t32c.com](http://www.t32c.com)) for updates on the latest happenings and for interacting with the team once they start operations - "your feedback will be especially important so that we can maximise every band opening".

SAVE DX LOGS! ---> This appeal comes from Bob Schenck, N2OO: "If anyone knows of any DX or DXpedition logs and blank cards that are in jeopardy of being trashed, PLEASE save them! If you are a QSL Manager and can't be bothered any more, PLEASE contact us! Contact the QSL Managers Society and we pledge to locate a quality replacement QSL Manager. Just because a DXpedition log is old does not mean that it is not worthy of being saved!" T32C ---> This is the FSDXA Christmas Island DXpedition Bulletin No.6, released by Don Field (G3XTT) on 30 September.

"This Bulletin is written Friday afternoon Christmas Island time. We have been busy the past two days erecting antennas for all bands 160 through 10, as well as setting up stations and the IT network, which interconnects all logging positions and provides lots of data for helping us plan the operating schedules once we are under way. Everything has gone well during set-up, with great co-operation from the staff of the Captain Cook Hotel. For the record, our advance party (G3NUG, G3USR, DK1II) made around 1800 QSOs on 10 and 20m, using 100 watts (FT-450D) to a small vertical by the sea, so we are confident that we should be able to make a big impression on the bands once we are fully operational.

Our plan is to commence operations at midnight local time today here in Christmas, which is 1000 UTC Friday 30th September [recte: Saturday 1 October, ed.]. We expect to be active on several bands from the start.

We do, however, have only one station per band for the time being, so for the first few days will probably alternate modes on a (roughly) 24 hour basis. On the non-WARC bands we expect to start on CW and then, at 1200 UTC on Saturday, move to SSB and make a serious multi-multi entry in the Oceania contest (which runs for 24 hours). This should get our SSB operations off to a great start. We are able to work all comers in the contest, so we very much want your call, whether you are taking part or just need a T32 QSO. We will give you a contest report (RS + serial number); if you are taking part please give us your serial number in return.

OTHER DXPEDITIONS: We are very much aware that there are other expeditions active at this time, and will take every care to avoid causing any sort of mutual QRM. This may well mean that we operate on frequencies other than those that we pre-announced. No doubt we will be spotted on the Cluster network, in any case.

ONGOING PLANS: We remain committed to maximising band openings to Europe, but expect the number of callers in the first few days to make this

difficult if not impossible. But bear in mind that we will be active for 3 weeks and four weekends, so there should be plenty of opportunities (propagation permitting) for a QSO. We will continue to send out news and photographs when the opportunity arises - our website is being regularly updated by webmaster G3WPH and those of who you who use Twitter can follow us on G7VJR's Twitter feed (@G7VJR)".  
QSL via G3NUG. QSLing instructions and updates can be found at www.t32c.com

+ SILENT KEYS + Helio "Carl" Carlota (PY2DBU) passed away on 25 + September. A

highly respected member of the Brazilian amateur radio community, he was a serious DXer and certificate hunter, and also served an IOTA Checkpoint in the past.

Jean Joveneau (F9LX), a member of the FO0XX DXpedition to Clipperton Island (1985), passed away on 25 September at 80 years of age.

Wilson Greatbatch (W2QBO) passed away on 27 September, aged 92. An electrical engineer, he was the inventor of the implantable cardiac pacemaker, which has led to heart patient survival rates comparable to that of a healthy population of similar age.

3D2R ---> It went QRT from Rotuma earlier than originally planned, at 11 UTC on 5 October. The team expected to depart the island at 12 UTC, and to reach Suva (Fiji) on the 8th. The final log update will be uploaded upon arrival in Suva. The 3D2R log search can be found at [www.qlsnet.de/member/yt3w/yt1ad/logsearch.php](http://www.qlsnet.de/member/yt3w/yt1ad/logsearch.php).

CQ DX MARATHON ---> CQ Magazine has announced "a significant expansion in the number of DX Marathon plaques to be awarded each year". Presently there are only two plaques (for the top Unlimited Class and for the top Formula Class scores); starting with the announcement of the 2011 Marathon results (June 2012), additional plaques will be awarded for the top CW, top SSB, top Single Band (10, 12, 15, 17, 20, 30, 40, 80) and top Continental scores. An additional sponsor for top Digital Mode score is desired. Please contact the DX Marathon Administrator, K9EL (k9el[[@](mailto:k9el@dxmarathon.com)]dxmarathon.com) if you wish to sponsor this plaque. Details on the new plaques and qualifying scores can be found on DX Marathon website ([www.dxmarathon.com](http://www.dxmarathon.com)).

MALPELO 2012 ---> The Malpelo 2012 DXpedition's team now consists of 18 operators representing eight countries. Two members of the team will travel to Malpelo for a reconnaissance visit in late October. The purpose is to check out possible operating sites and make final decisions on the type and placement of antennas, as they want to try to have antennas oriented for all parts of the DX world.

Every effort is being made to extend the length of time available for operating. It appears that they can get to the island one day earlier and may have the option of staying a few extra days. The current plan has the team QRV on or about 23 January for 12-14 days. Operations are planned on 160 through 6 metres on CW, SSB and one digital mode. N2OO and the SJDXA will handle QSL duties.

The Malpelo team is paying all their transportation expenses to/from Colombia and putting up about one-half of all the DXpedition costs. To cover the remainder of our expenses, contributions are being sought from DX Foundations, DX Clubs and individual DXers. You may contribute directly to DXARC (Colombia), K4UEE (North America), DJ9ZB (Europe) or JA1ELY (Asia/JA). See [www.hk0na.com](http://www.hk0na.com) for further information on how you can help. [TNX K4UEE]

ROCKALL ---> Patrick, ON4HIL and Rudi, ON7YT were active on 40m as MM0RAI/p from Rockall (EU-189) from 15.45 UTC on 1 October until 06.52 UTC on the 2nd. The logsearch is now up and running at [www.rockall.be](http://www.rockall.be)

SAC SSB ---> The Scandinavian Activity SSB Contest will be held on 8-9 October, from 12 to 12 UTC. Radio Arcala has set up a special DX Summit sub-page ([www.dxsummit.fi/sac](http://www.dxsummit.fi/sac)) so you can follow the Nordic country-to-country battle and also find exclusively individual Nordic spots. [TNX OH2BN]

T32C ---> The DXpedition to Christmas Island has passed the 60,000 QSO milestone (57% CW, 40% SSB and 3% RTTY, but the team is "making an effort to increase the RTTY percentage").

This "has turned out to be something of an unplanned Field Day style operation", G3XTT reported on 5 October, "and we now have no expectations of our container of equipment arriving while we are here on Christmas Island. Instead, the team hand carried just over one metric tonne of equipment (poles, cables, radio gear, computers, etc) to the island".

Antenna-wise, they have "two-element vertical dipole arrays by the sea for 20 through 10, quarter-wave verticals with elevated radials for 30 and 40, a quarter wave vertical with ground radials for 80 and a 15m high T antenna with ground radials for 160. We also have two Beverage receive antennas for 160 and now have additional vertical dipoles for 10, 15 and 20 to allow us to retask the low band stations as second stations on those bands when LF is closed. We are continually refining our antenna systems within the limits of the wire, poles and coax that we have here, though the second tranche of operators who arrive in a week's time will bring more".

The current continental percentages are 54% NA, 24% AS, 17% EU, 5% others: "we have pretty much been working all comers to clear the decks so that we can begin to focus more on Europe where band openings are much more limited than to the US and Japan". The latest press release, as well as the logsearch and a feedback facility, can be found on the T32C website ([www.t32c.com](http://www.t32c.com)).

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at [www.425dxn.org/awards/toplist/index.html](http://www.425dxn.org/awards/toplist/index.html). QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW ([i2eow@fastwebnet.it](mailto:i2eow@fastwebnet.it)).

3D2RI ---> This is the callsign of the new Rotuma Island High School Club Station, established thanks to the equipment donated by the 3D2R DXpedition team. The new Club Station has been active since 6 October. QSL via KH6CG.

425 DX NEWS MAGAZINE ---> The September 2011 issue is now available for download at [www.425dxn.org/monthly/index.html](http://www.425dxn.org/monthly/index.html). [TNX IZ3EBA]

FUNDING FOR OPERATIONS FROM RARE IOTA GROUPS ---> "With the 50th Anniversary IOTA Marathon [425DXN 1042, ed.] starting in January it would be great if we could get together a list of organisations who would be prepared in principle to help fund operations from the rarer IOTA groups during this two year period. Without lots of operations from this tier of IOTA groups the marathon will not achieve the success it deserves. For this purpose we have decided that "rarer IOTA groups" means groups worked by less than 33% of record-holders at the start of day 1 of the operation. Would DX funding bodies and individuals who are prepared to contribute to this two year IOTA initiative please let me know on [g3kma\[@\]dsl.pipex.com](mailto:g3kma[@]dsl.pipex.com). The intention is that grants would be made directly by contributors to the operation involved as is current usual practice, not through the IOTA Committee. However if we get a good response, we will consider providing some additional funding from a source of funds available to the IOTA Committee." Full details on the 50th Anniversary Marathon can be found at ([www.rsgbiota.org](http://www.rsgbiota.org)). [TNX G3KMA]

MS0INT (ROCKALL 2012) POSTPONED ---> "With careful consideration and much deliberation, we have decided to postpone our intended activation of the islet for at least one year", Col MM0NDX says (see [www.eu189.com](http://www.eu189.com) for the complete release issued on 8 October). "This decision was not taken easily considering our planning and organisational aspects were going extremely well. Suffice to say, we believe an activation so soon after the Belgian effort [MM0RAI/p, ed.] now makes Rockall a less attractive target - that is the crux of our decision. It is not lost on us that the majority of the world, outwith a proportion of Europe, still require EU-189 for their IOTA scores. With that in mind, this planned activity will not be cancelled, only postponed".

Instead of Rockall, MM0NDX and his team are organizing an operation from "another excellent location", which "involves a rare DXCC and IOTA". Further information will be released "one week before departure, sometime in mid-2012".

Wolf Harrant, OE1WHC reports that "a comprehensive Rockall web page from early plans in the mid-60's (with hitherto unpublished documents) to MM0RAI/p including an interview with Patrick, ON4HIL" has been compiled by Documentary Archives Radio Communications and can be found at [www.dokufunk.org/rockall](http://www.dokufunk.org/rockall)

QSL AT0ULH ---> The QSL cards for the 19-21 August operation from the lighthouse at Uttan Point have been printed and Deepak, VU2CDP is mailing them out. Email requests for bureau cards can be sent to [vu2cdp\[ \]@yahoo.co.in](mailto:vu2cdp[ ]@yahoo.co.in). He plans to send out the bureau cards "as part of my annual dispatch to the VU buro in December". [TNX VU2CDP]

SPRINT CONTEST ---> The Michurinsk Contest Group and Tambov division of SRR organize an Autumn Sprint Contest that will be held on 21 October, from 14 to 18 UTC, on 160,80 and 40 metres CW and SSB. Complete details can be found at [http://rw3rq.tamb.ru/sprint\\_eng.htm](http://rw3rq.tamb.ru/sprint_eng.htm) [TNX RN3RQ]

T32C ---> "We have been asked to be more precise about our 80/160m scheduling at European sunrise", the T32C team wrote on 14 October. "Starting today (Friday 14 October), we will operate CW on 80m for two days at European sunrise, then we will operate 1 day on SSB. The pattern will be repeated, so CW days will be 14, 15, 17, 18, 20, 21, 23, 24 October. SSB days will be 16, 19, 22, 25 October. On 160m we are always on CW from our sunset to Western European sunrise".

T32C now has over 131,000 QSOs in the log, including 70k with North America, 25k with Asia and 30k with Europe: "as the JA and US pile-ups continue to diminish", the team reported on 10 October, "we hope the percentage of EU will increase. However, the decline in solar activity since we first started has not helped. That said, we are on track to set at least a few new records".

They continue "to cover as many band/mode openings as we can, with the equipment we carried here. We are currently able to operate two stations simultaneously on 10, 15 and 20 and are looking at being able to do the same on 12 and 17 to make the most of the main band openings, but with limited coaxial cable (it's heavy to hand carry!) we are having trouble achieving the antenna separation we ideally need". Read the latest news from the island at [www.t32c.com](http://www.t32c.com)

+ SILENT KEYS + Jose Castejon Lara (YV5ANT) passed away at 70 years of age. He was one of the best CW operators and contestmen in Venezuela, and took part in several expeditions to YV islands, including four operations from Aves between 1979 and 2006.

Other recently reported Silent Keys include Vladimir I. Shamalo (RX6AV), Stojan Cvetkovic (YU1SW), Metodija Najceski (Z31VL), Craig "Tex" B. Kennedy (N5TX, President Emeritus and Co-founder of Six Meter International Radio Klub) and Paul Zrobok (G0UZP), who died suddenly on 6 October at 57 years of age.

9N1AA ---> "Satish is back on the air after a very long time of inactivity", Carl N4AA (n4aa[@]dxpub.com) reports. "I have agreed to resume acting as his QSL Manager. I now have his logs for the first few days of his operation in mid-October 2011. I do not have ALL of his old logs. Many of those were lost when his computer was confiscated and are no longer available. If you want me to check for any OLD contacts, email me the data and I'll look, but it is doubtful that I can confirm many, if ANY, of those

old contacts. SAE with adequate postage is required for direct response".

JOTA ---> CR2AEP, CR2ARQ, CR2ASM, CR2ASS, CR2BSA, CR2JNT, CR3ASA, CR3EPM, CR5AAE, CR5AAR, CR5ACB, CR5ACE, CR5AEA, CR5AEA, CR5AEC, CR5AED, CR5AEE, CR5AEM, CR5AEO, CR5AER, CR5AEV, CR5ALV, CR5AMF, CR5AMO, CR5APA, CR5APL, CR5APM, CR5APR, CR5AQA, CR5BAE, CR5BJA, CR5BRG, CR5CEO, CR5COR, CR5EAL, CR5EAP, CR5ECC, CR5ECH, CR5ECM, CR5EEC, CR5EMC, CR5EMG, CR5EPA, CR5EPC, CR5EPG, CR5EPM, CR5EPO, CR5ESB, CR5ESC, CR5ESJ, CR5ESS, CR5EVA, CR5FAV, CR5FMG, CR5FOV, CR5FSA, CR5GEU, CR5GPS, CR5JNE, CR5JRA, CR5JRB, CR5JRC, CR5JRP, CR5JRV, CR5JVC, CR5LRS, CR5LUZ, CR5LVT, CR5MAF, CR5MFR, CR5MON, CR5MSP, CR5NGC, CR5NSF, CR5NSL, CR5PAE, CR5PEN, CR5RNC, CR5SAC, CR5SAE, CR5SCD, CR5SJT, CR5SME, CR5SNT, CR5STR, CR5VNT, CR6CNE, CR6DNR, CR6FNA and CR6JAM were reported active during the 54th Jamboree On The Air (15-16 October). QSL via bureau. [TNX CT1END]

QSL NA-089 ---> AB5EB/p, AD6D/5 and K0AP/5 made over 3700 QSOs with 2600 unique calls during their recent activity from Grand Island [425DXN 1066]. Each of them will have all the logs: "so if you worked more than one of us and would like a card for each contact", Mike AB5EB says, "you can send all the cards to one operator who can answer for all three calls. It does not matter who you send the card to". [TNX islandchaser.com]

STOR & LOTW ---> "As you may know, the distribution of STOR QSL cards has begun. The Republic of South Sudan was recently added to the DXCC entities list, so each QSO confirmed by our manager will be the confirmation of a new one.

Because of this, the DXCC Desk has expressed the concern that they may be overwhelmed by thousands of applications to credit the new entity.

Consequently, we have decided to make an exception, and upload to the LOTW all the individual donor QSOs and OQRS ones, by 1st November". [TNX EA5RM]

T32C ---> "The QSO count is currently [on 21 October, Ed.] at 188.75k with 49% CW, 41% SSB and 9% RTTY. As you might guess we are working hard to exceed 200k.

During the day (local time) we are running a 6m beacon on 50.102.MHz. If you hear the beacon please put a note on the cluster and we will break the beacon and try for QSOs. So far we have had 99 six metre QSOs, mainly with the West coast USA and Hawaii. The beacon has been heard in Japan and South America. We have also completed a number of 6m EME QSOs.

With just a few days to go to the end of the DXpedition we are beginning to plan the station close down. There will be a phased shut down beginning at 1600z on Monday 24th October, with the last station closing by 0100z on Tuesday 25th. We will keep the 'high rate' stations running as long as possible.

If you look at the on line log and QSOs that were previously in there appear to be missing, don't despair, query the log a little later, they will be there".

+ SILENT KEYS + David Caouette (N6DAC) was killed in Seal Beach, California

on 12 October, when a gunman, driven by a desire to kill his ex-wife, went on a deadly shooting rampage, leaving eight people dead. Ulyanov (UA5DX, ex UA3FDX), K. R. Vasantha Kumar (VU2VWN), Charles R. Imsande (W6YLJ) and Dudley N. Kaye-Eddie (Z22JE).

4W6A ---> Logs were uploaded to LoTW a few days after the end of the DXpedition and QSL cards have been ordered. As of 23 October, QSLs for over 11,000 QSOs have already been requested either direct or by OQRS. These requests have already been processed and the direct QSLs will be sent as soon as the cards are received from the printers. Bureau cards requested by OQRS will be sent out soon afterwards, with direct mailings to the major QSL bureaux of the world.

A report on the DXpedition with a few photos and videos can be found at [www.m0urx.com](http://www.m0urx.com), while 150 more photographs have been uploaded to the Gallery on [www.4w6a.com](http://www.4w6a.com). More videos taken by VK8DX and MW0JZE can be found on

YouTube - search "4W6A" and look for the videos uploaded by "mw0jze". [TNX 9M6DXX]

**EARTHQUAKE EMERGENCY** ---> Radio Amateurs in Turkey remain active in the response to the earthquake that struck Van province on 23 October. Assistance has been given by TRAC in setting up VHF/UHF networks to relief agencies and some traffic is being carried on the 144 MHz band. The need for HF operations is reducing, however there is still a government station which may operate on 7.092 MHz USB. Amateurs are still requested to be careful when operating between 7.092 and 7.095 MHz to avoid interference to ongoing relief operations. [TNX IARU Region 1]

**IOTA EU-155** ---> The retention of EU-155 in IOTA list is in doubt. "The IOTA Manager was informed at Ham Radio 2011 Friedrichshafen that the two barrier islands listed as qualifying for EU-155, Baron and Scanno di Piallazza, no longer exist. Authoritative information has now been provided by a local operator to show this probably to be the case. It is worth noting that the Po Delta is a remarkably fragile natural environment with barrier reefs, as and when they occur, subject to change by tide and storm. IOTA rules require that, in the absence of qualifying islands, the group concerned should be suppressed. One final check will be made on the latest satellite pictures expected shortly following which a decision will be taken and a notice issued. In the meantime, no new operations claiming to take place from EU-155 will be regarded as qualifying for credit". [TNX Roger Balister, G3KMA, RSGB IOTA Manager]

**RADIO ARCALA & CQWW SSB CONTEST** ---> Radio Arcala ([www.radioarcala.com](http://www.radioarcala.com)) will deploy five stations in this year's event:

OH0X from the Aland Islands operated by OH2PM; OH2BH from Southern Finland operated by OH6UM; OH8X from Northern Finland operated by OH6KZP; OJ0X from

Market Reef operated by OG9X, OH0XX, OH2BH, OH6VM and SM0W.  
All CQWW QSOs, SSB and CW, by Radio Arcala stations will be confirmed on a  
single X-rated QSL card and via LoTW. [TNX OH2BN]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at [www.425dxn.org/awards/toplist/index.html](http://www.425dxn.org/awards/toplist/index.html). QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW (i2eow[[@](mailto:i2eow@fastwebnet.it)]fastwebnet.it).

MALPELO 2012 ---> Three members of the HK0NA team have just completed a seven day reconnaissance visit to the island. This will be a very demanding DXpedition for several reasons - read the summary of their observations and view some very revealing pictures on [www.hk0na.com](http://www.hk0na.com). K4UEE, N4GRN and W6IZT will travel to Colombia on 5-8 November for a planning meeting with team leader, Jorge HK1R and other team members. With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition. One critical decision to be made concerns the duration of the operation, as they have permission to stay on site for 17 days versus the 14 days now planned. They will be reviewing the DXpedition budget to determine if they can afford the extra \$15,000 expense for three additional days. Contributions are gratefully accepted at [www.hk0na.com/sponsors](http://www.hk0na.com/sponsors) [TNX K4UEE]

QSL A51PN ---> "Last week when in Bhutan, I met Pradhan, A51PN", Glenn Johnson (W0GJ/A51B) says. Pradhan "is now 73 and in good health and living a quiet retired life", but he "was very active from 1972 to 1983 when he worked in the Wireless Dept of the Bhutan government. He gave me his stack of log books to digitize and upload to LOTW, about 30,000 estimated contacts. I will be able to answer QSL requests for anyone needing a card for A51PN. He has meticulous notes in his logs about QSLs that were returned". QSL to Glenn R. Johnson, 207 Bear Creek Ln NW, Bemidji MN 56601, USA.

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's

web site has been updated. Fourteen different galleries include more than 9500 cards for the ten Most Wanted DXCC Entities, the 60 deleted DXCC Entities, obsolete prefixes, stations from Magrebh from 1947 to 1962, D5 and DL5 stations from 1945 to 1962, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS. plus a gallery for cards not accepted by DXCC. Several cards are still needed and your participation is encouraged - please visit [www.LesNouvellesdx.fr](http://www.LesNouvellesdx.fr) and send your comments to [lesnouvellesdx\[@\]free.fr](mailto:lesnouvellesdx[@]free.fr) [TNX F6AJA]

425 DX NEWS MAGAZINE ---> The October 2011 issue is now available for

download at [www.425dxn.org/monthly/index.html](http://www.425dxn.org/monthly/index.html). [TNX IZ3EBA]

E35X ---> "It has come to my attention that rumors are going that I am planning an expedition to Eritrea using the call sign E35X", Erling LA6VM says. "These rumors have no basis in any real situation".

E35X was the callsign used by LA6VM (along with LA1EE, LA7XK, LA9DL and JF1IST) back in June 1993, soon after Eritrea declared its independence and gained international recognition.

ID9DXC ---> This is the callsign the DXCoffee IOTA team will use from various islands in the Eolie group (EU-017) in 2011 and 2012. The first activity was expected to take place on 18 November from Panarea Island. QSL via IT9YVO, direct or bureau. Information at [www.dxcffee.com/id9dxc/](http://www.dxcffee.com/id9dxc/)

RADIO ARCALA & CQWW CW CONTEST ---> Radio Arcala ([www.radioarcala.com](http://www.radioarcala.com)) will deploy five six stations in this year's event: 9H9BH from Malta (operated by OH2BH), CR2X from the Azores (operated by OH2UA), OH0X from the Aland Islands (operated by OH2TA), OH2BH from Southern Finland (operated by OH2IW), OH8X from Northern Finland (operated by ES2RR) and TC2X from Asiatic Turkey (operated by OH2PM). [TNX OH2BN]

VQ9JC ---> Jim, ND9M is back at Diego Garcia (AF-006), Chagos Islands and expects to be QRV at least until 1 March 2012. The local licensing office renewed his regular license (VQ9JC) for two years and also issued another short-term special prefix callsign (VQ91JC) for him to use from 19 November through 4 December. This will include a SOAB Low Power entry in the CQ WW CW Contest.

His usual QRV hours are 12.00-16.30 UTC on most days. He operates from the club station, where the current situation is far from being optimal.

"Visitors over the last few months disconnected a number of coax and other cables without labeling them first", he says, "so I'm doing a lot of cable tracing (and labeling!). Much of the cabling work that VQ9LA did over the years has been removed for no apparent reason.

The finals in both amps (Alpha 99 and AL80B) have failed, so I'll be running barefoot for the foreseeable future. The amps are owned by the Navy, but the Navy hasn't provided any equipment repair support for several years, and I'll have to buy the replacement finals out of pocket, but that won't happen for several months.

Also, the log periodic (10-30 MHz) works well, but the rotator binds around 020 degrees when turning clockwise (from north towards east). There's an apparent issue with strain on the coax caused by turning the rotator and maybe even the connection at the top of the 30-meter tower; the SWR skyrockets when the rotator is turned beyond 020 degrees as it moves to the east.

For now, the antenna will be left facing northwest rather than risk causing permanent damage until I can get up there. This heading favors the path to Europe and the Americas, but obviously hurts the paths to JA and VK/ZL to the east as well as Long Path to NA to the south, but it can't be helped at this point.

The single remaining HF rig is an IC-760 which has a lot of years and miles on it, but its performance is still adequate. (There's an FT-920 that's barely good enough for QRP on a couple bands.) I brought an FT-857 from home which I'm using to work the LEO satellites. It will also serve as a back up for HF should the 760 come into hard times.

I'll be putting up a 5-element 6M beam. That antenna won't be on the tower, but should still be high enough to take advantage of the openings that have finally started appearing. I'll use the FT-857 for working 6M as well as

the satellites".

ARRL 10 METER CONTEST ---> The annual ARRL 10 Meter Contest will be held on 10-11 December. Complete details can be found at [www.arrl.org/10-meter](http://www.arrl.org/10-meter)

DXCC NEWS ---> ARRL Awards Branch Manager Bill Moore, NC1L reports that 5X1VJ (Uganda, 2011 operation) has been approved for DXCC credit.

MALPELO 2012 ---> This is the latest information released by the HK0NA DXpedition organizers on 28 November.

"Recently three US members (K4UEE, N4GRN and W6IZT) of the Malpelo 2012 DXpedition flew to Cartagena, Colombia and met with six of their Colombian counterparts. The purpose of the two day meeting was to make some critical decisions about the upcoming DXpedition to Malpelo Island. Also, checklists and inventories were finalized and all team members' responsibilities were assigned.

Since it is highly unlikely that the various Colombian authorities will permit another DXpedition to Malpelo anytime soon; a decision was made to extend the DXpedition to 16-17 days from the previous 12-14 day plan. The approximate dates of operations will be January 21, 2012 through February 5/6, 2012.

Four team members will travel with all equipment, radios, antennas and infrastructure to Malpelo in early January. They will be transported by the Colombian Navy. They will arrive about two weeks prior to the rest of the team and will set up camp, the two operating sites, radios and antennas. They will spend about 30 days on the island. This will allow the rest of the team to begin radio operations immediately upon arrival by chartered vessel.

As mentioned there will be two operating sites, each with a complete complement of antennas and radios with amplifiers. The first operating site will be co-located with the Colombian marine's camp on the east side of the island. It is clear to East Coast USA, EU and Africa. In order to have a clear shot at JA/Asia, the Pacific region and W6/W7; the second operating site will be located near the top of the highest mountain peak on the island. However, to lessen the physical risks to the team members, the operating site will be located on platforms situated below the actual peak. Still, it will be a 45 minute uphill climb to reach the platforms. The antennas for that site will be on the top of the mountain peak. At times, there will be as many as nine stations QRV with the capability of dual mode operations on all bands.

Safety of the team is paramount. We will be installing a winch system to hoist team members and all of our equipment from our chartered ship's Zodiac onto the island. From there, manpower will carry the equipment the

300 meters straight uphill to the marine camp. The trail to the elevated operating site is extremely dangerous. We will utilize harnesses and safety ropes to minimize the risks. This is going to be a difficult and expensive DXpedition. Every effort will be made to maximize QSOs while protecting the safety of the team members. It is a delicate balance. Your financial support is necessary and gratefully accepted. Contributions can be made via our website at: [www.hk0na.com/sponsors](http://www.hk0na.com/sponsors)

QSL A71CV ---> Buzz, NI5DX, has assumed the duties of QSL manager for Abdulla A71CV, whose previous manager (A71AN) is now a SK. Abdulla will soon send Buzz his logs and the two will work on the design of a new QSL card. No cards should be expected from NI5DX until the new QSLs are received from the printer (the process could take as long as 6-8 weeks). [TNX The Golist]

QSL ET3AA ---> The QSL route for contacts made with ET3AA and ET3SID on 8-13 December [425DXN 1071] is via N2OO. Either direct and bureau cards can be requested online by going to [www.qsl.net/n2oo/history/qsl-n2oo.htm](http://www.qsl.net/n2oo/history/qsl-n2oo.htm)

T2T ---> The T2T DXpedition to Tuvalu ([www.t2t.pacific-dxers.com/T2T.html](http://www.t2t.pacific-dxers.com/T2T.html)) will go QRT on 3 December, a few days earlier than planned. "We have been doing everything possible to avert this", VK4FW says, "but realistically have no choice due to persistent power problems". The T2T online log totals (on 30 November there were 39347 QSOs) also include contacts made by T2V during the CQ WW DX CW Contest. Speaking of which, during the contest "we inadvertently sent 32 as our zone. So if you put that in your log, then you copied our exchange Correctly. We have since realised that it should have been 31... and have advised the contest committee. How this error will be managed will be up to them. We sincerely apologise for this mistake!"

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at [www.425dxn.org/awards/toplist/index.html](http://www.425dxn.org/awards/toplist/index.html). QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW ([i2eow@\[fastwebnet.it\]](mailto:i2eow@[fastwebnet.it])).

"This specially developed web interface allows for mobile devices of many types to access the DX Cluster while at the same time providing customization to you which can be done after creating an account. While there are sure to be some mobile device compatability issues, most smart phones released within the past few years should be able to interact with Dx2Go". It can be accessed at <http://m.dx2go.com>.

- 3DA - Phil, G3SWH and John, EA5ARC (G3OLU) will be active from Swaziland on 21-29 February. The two will be using a single callsign (TBA) and will operate CW only on 80-10 metres with two stations. QSL via G3SWH, preferably via the OQRS facility on Phil's web site ([www.g3swh.org.uk](http://www.g3swh.org.uk)), otherwise direct or bureau. Subject to a good Internet connection, there will be on-line log on Phil's web site and daily uploads to LoTW. [TNX G3SWH]
- 9X - Carl, SM6CPY will be active holiday style as 9X0PY from Rwanda from 24 December to 7 January. QSL via home call, direct or bureau. [TNX DX World]
- JA - Look for JS6RRR and JS6RRR/6 to operate from Miyako Island (AS-079) from 23 December to 5 January. Activity will be on 160-6 metres CW, SSB, RTTY, PSK31 and FM. Side trips to the nearby islands of Ikema and Kurima are also being planned. QSL via bureau.
- P4 - The IARU affiliated Aruba Amateur Radio Club (P43ARC) "has been lobbying, for over 15 years, to update the current and very outdated legislation governing Amateur Radio in Aruba". A special event activity under the callsign P41HQ is taking place "in order to raise awareness with our officials and to show international support". All of the QSOs will be confirmed via I2MQP; if you want to show your support, even if you do not work P41HQ, please follow the special instructions at <http://qrz.com/db/p41hq>
- VK - John, VK6HZ will be active again as VK6ARI from Rottneest Island (OC-164) on 23-30 December. QSL via home call and LoTW. [TNX rsgbiota.org]
- VP6 - On 12 January the VP6T team [425DXN 1056] will start the journey to French Polynesia, with the first stop in Tahiti (OC-046) for 3 days before taking a small airplane to Mangareva Island (OC-063). They plan to be active from Tahiti - and if time permits also from Mangareva - as TX6T (QSL via G3TXF).  
From Mangareva, they will sail for approximately 3 days; depending on weather, they expect to be QRV from Pitcairn Island (OC-044) on or around 20 January. The stay on Pitcairn has been extended for one extra week, and VP6T will be on air until 4 February. Plans are to have three stations active round-the-clock on 160-10 metres CW, SSB and RTTY. Efforts will be made to give this extremely rare Entity on as many bands as possible, but especially on the low bands. QSL via G3TXF, direct or bureau, and LoTW. QSLling instructions and further information, including details on how contribute to this expensive project, can be found at [www.vp6t.org](http://www.vp6t.org)

425 DX NEWS MAGAZINE ---> The November 2011 issue is now available for  
download at [www.425dxn.org/monthly/index.html](http://www.425dxn.org/monthly/index.html). [TNX IZ3EBA]

DXPEDITION OF THE YEAR ---> The poll for the "DXpedition of the Year"  
as voted by readers of DX World.net can be found at  
<http://dx-world.net/2011/dx-world-dxpediton-of-the-year-2011/>. The criteria  
behind the poll is to remind operators of the many notable DXpeditions  
which occurred during the last 12 months and to vote for their favourites  
(\*five\* choices overall). Poll closes on 15 January 2012. [TNX MM0NDX]

ET3AA: STUDENT LICENSE PROJECT RESULTS ---> The results of the US FCC  
Amateur Radio License examinations administered for 62 students at the  
Institute of Technology of the University of Addis Ababa on 10-13 December  
are as follows: 5 Extra Class, 36 General Class and 16 Technician Class  
Licenses issued; five did not receive a license.

"After we get our logs combined", K3LP says, "we'll upload the results to  
the Logbook of the World plus post the results as a search function. Thanks  
to everyone for their understanding regarding the low bands. A future goal  
will be set to operate from a remote location with exceptional receive  
antennas". QSL ET3AA and ET3SID via N2OO for 8-13 December 2011 only.

HS0AC ---> "After over five weeks of inundation by flood water at the Asian  
Institute of Technology campus at Kilometre 42 on Phaholyothin Road, a team  
of RAST members led by station manager Finn, OZ1HET and President Chaiyong,  
HS1QVD visited the club station there on Saturday, December 10". Finn  
describes the situation as follows: "The club station was completely  
destroyed, everything in there spoiled so we could only 'scrap' all out as  
garbage. All furniture had fallen apart and everything was full of mud and  
smelling very bad". The "HS0AC Horror Story", along with several impressive  
pictures, can be found at [www.qsl.net/rast/](http://www.qsl.net/rast/)

IOTA ANNUAL UPDATE ---> The deadline for the 2012 Honour Roll and Annual  
Listing approaches. Applications and updates submitted online on or before  
31 January will count for the 2012 tables so long as the supporting cards  
sent to checkpoints are postmarked no later than that date. Updates  
postmarked after 31 January will be processed in the normal way but scores  
will be held over to 2013. Listing in the tables is restricted to those  
participants who have updated their scores at least once in the previous  
five years (in the case of the 2012 tables this means since the 2007 annual  
listings). Please submit online and not on paper - card volumes are now

such that paper applications place an unacceptable burden on checkpoints. The 2012 tables will appear on [www.rsgbiota.org](http://www.rsgbiota.org) in the Spring.

QSL 3B7C & 3B9C ---> T32C has prompted renewed interest in getting missing cards from those trips. The following have taken over QSLing responsibilities for the 3B7C (2007) and 3B9C (2004) DXpeditions: 3B7C QSLs should now be sent to M0ZAK (Jim Steel, 6 Central Avenue, Shepshed, Leics LE12 9HP, United Kingdom) and 3B9C QSLs should now be sent to G3RAU (Derek Moffatt, Mill House, Middle Street, Glentworth, Gainsborough, Lincs DN21 5BZ, United Kingdom).

QSL KG4AJ ---> Buzz, NI5DX, has assumed the duties of QSL manager for Norm, KG4AJ, who expects to be at Guantanamo Bay for two years. A new QSL card will be designed, and it will take about 4 weeks to receive the cards once the order has been placed. Buzz is awaiting a log transfer from Norm, then he will be able to confirm all past contacts with KG4AJ.

QSL T32C ---> "The card design has been finalised and we plan to start mailing cards in January after the Christmas postal rush", G3XTT stated in the latest press release dated 11 December (see [www.t32c.com](http://www.t32c.com)). "We have a team of 10 QSL managers ready to start processing the T32C cards and we estimate that we will eventually confirm around 140,000 QSOs". As for LoTW, "we promised an upload within six months and, in practice, it will be very much earlier. We wanted to upload as clean a log as possible and have made some 500+ editorial changes to the log as a result of feedback from the log uploads to Club Log and notes received from many of the Deserving. But we are very conscious that many of you want to do a DXCC update before year-end. Therefore, LoTW permitting, we plan to start the upload on 15 December, just over six frenetic weeks after our return from T32C. Uploading 213k QSOs is a huge task and we don't necessarily expect it to go smoothly first time (D68C, 3B9C and 3B7C all experienced problems), so the upload may take several days to complete".

+ SILENT KEYS + Harry Berry, G0JMU (7Q7HB) died of a massive heart + attack on 12 December. He was regularly active from Malawi for a few months every year. "All of his logs are in my possession", his QSL manager (G0IAS) says, "any outstanding cards will be answered".

Other recently reported Silent Keys include Benjamin Alfonza Shaver Jr (AA4XU), Derek Nicholls (G0GTC), Giulio Biagini (I5HUE), George J. Wesley (KB2VO), Don Schmidt (N8AC), Robert H. Ekleberry (W4CKD), John E. Hamlet Jr (W4ZW), Frank James Connelly (W7ND), W. H. Deverall (ZL1VS) and Bert Howes (ZS6HS).

IOTA 50TH ANNIVERSARY MARATHON ---> The 50th Anniversary Marathon starts on 1 January 2012 [425DXN 1042]. For a two-year period (from 00.00 UTC 1 January 2012 until 23.59 UTC 31 December 2013), IOTA chasers are encouraged to contact as many different IOTA groups as possible, and IOTA activators to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones. As participants will need the island name, not just the IOTA reference number, for the island station worked, those who post spots on the clusters are encouraged to include the island name in their postings where there is more than one IOTA group possibility. Full details of the Marathon are available on [www.rsgbiota.org](http://www.rsgbiota.org).

- 3DA - 3DA0PW is the callsign issued to Phil, G3SWH and John, EA5ARC (G3OLU) for their 21-29 February activity from Swaziland [425DXN 1076]. They will operate CW only on 80-10 metres with two stations. They have a webpage at [www.g3swh.org.uk/3da0pw.html](http://www.g3swh.org.uk/3da0pw.html). QSL via G3SWH and LoTW. [TNX G3SWH]
- 9A - The 9A prefix was issued to Croatia (previously YU2) twenty years ago. To celebrate this anniversary, several Croatian individual and club stations have been granted permission to add "20" to their prefixes (e.g. 9A0Z = 9A200Z, 9A1MM = 9A201MM, 9A2AA = 9A202AA, etc) from 1 January through 31 December 2012. Information on the relevant award can be found at [www.hamradio.hr](http://www.hamradio.hr)
- CY0 - AA4VK and WA4DAN arrived in Halifax, Nova Scotia on 27 December in preparation for the Sable Island DXpedition [425DXN 1077]. Severe winds made it unsafe to fly on 28 December, and the "beach runway" on the island has been covered with water since the 29th. "Due to the uncertainty of when the runway will be suitable for landing", they reported on the 30th, "we decided to delay the DXpedition and return to the US".
- FO - The VP6T team will be active as TX6T from Tahiti (OC-046) [425DXN 1076] both on their way to and returning from Pitcairn. The tentative dates are 15-16 January and 8-10 February. There might be a short operation as TX6T/p from Mangareva (OC-063) on 6-7 February, but that activity will depend on the early arrival of the return boat from Pitcairn. QSL via G3TXF. [TNX DX World]

Bookmark <http://hk0na.com> for updates.
- KH3 - Susan, W7KFI has to postpone her operation from Johnston Atoll [425DXN 1071] for 4-6 weeks. The US Fish & Wildlife Service requires the she "pulls her boat out of the water and has the hull scraped, then repainted. The shipyard who would do this work cannot get Susan an appointment until approx four weeks from now",

The country list to be used for the Diamond DXCC Challenge is based upon the list of 231 places shown in 1937. The idea is to work nowadays entities (not only traditional DXCC entities, but also cities, IOTA groups, and various sub-political entities inside DXCC entities) that represent the places listed 75 years ago. Complete details can be found on the dedicated web pages at [www.arrl.org/diamond-dxcc](http://www.arrl.org/diamond-dxcc)

HS0AC ---> The Northern California DX Foundation announced a "Christmas gift" of \$500 to help rebuild and re-equip the Radio Amateur Society of Thailand's HS0AC Club station that was destroyed by recent flooding [425DXN 1076].

The three towers and multi-band yagis were not harmed, the clubhouse itself can be refurbished and used again, and the HS0AC computer logs are safe. However, there are no surviving radios: 14 rigs were lost along with amplifiers and all other devices (read the "HS0AC Horror Story" at [www.qsl.net/rast/](http://www.qsl.net/rast/))

HS0AC is appealing to the world to help re-build. The goal is to get at least one complete station replaced as soon as possible, but replacement will expand as funding is available. This station is open for operation by any licensed amateur, from anywhere, and for decades has represented Thailand in contests and as a first HS DX contact. Please help Thailand

hams by donating any amount via PayPal (donate[[@](mailto:donate@rast.or.th)]rast.or.th). All donations will go entirely to rebuilding the station.
